YOUR INVITATION TO A RISK ASSESSMENT WORKSHOP

On the evening of June 30 the U.S. Department of Energy (DOE) at the Weldon Spring Site will host the third in a series of workshops. These workshops are designed to provide information on the site that will assist you in understanding soon-to-be-released documents discussing the final cleanup of the radioactive and chemical wastes at the site.

This upcoming workshop will address risk assessment, a key component of the remedial investigation/feasibility study (RI/FS) process; a process that is nearly complete. The risk evaluation assesses potential risks associated with the treatment and disposal of the site waste.

Because it is impossible to discuss risk assessment without getting into some serious math and science, the workshop will be a little more on the technical side than its two predecessors, the Geologies and Technologies Workshops. Every attempt will be made, however, to present the material so everyone can understand.

The workshop will be held 6:30 to 9:30 p.m. at the St. Peters Holiday Inn. Attached you will find a tentative agenda. There will **not** be a poster session during this workshop. The nature of discussion does not lend itself to poster displays.

Please use the enclosed registration form to register your planned attendance. RSVP are needed by June 25 so we may have an accurate count.

Sincerely,

S H McCracken

Stephen H. McCracken
