RE: Proposed Weldon Spring Quarry Discharge Pipeline Project and Southeast Drainage Area (DOE), Weldon Spring, St. Charles County, Missouri

Dear Mr. Hlavacek:

The Historic Preservation Program has reviewed the 20 July 1990 reports entitled "A Phase I Survey and Evaluation of the Proposed Weldon Spring Quarry Discharge Pipeline Project Area, St. Charles County, Missouri" and "A Phase I Survey and Evaluation of Part of the Southeast Drainage of the Weldon Spring Remedial Action Project Area, St. Charles County, Missouri" by Gary Walters. Based on this report, it is evident that an adequate records and literature review has been made of both project areas.

We agree with the investigator's recommendations as outlined in these reports that no significant cultural resources are located within either of the proposed project areas. Therefore, we have no objection to the initiation of project activities.

However, if the currently defined project area or scope of project related activities is changed or revised, or cultural materials are encountered during construction, the Missouri Historic Preservation Program must be notified and appropriate information relevant to such changes or revisions be provided for further review and comment, in order to ascertain the need for additional investigations.

If I can be of further assistance, please write or call 314/751-7860.

Sincerely,

HISTORIC PRESERVATION PROGRAM

Michael S. Weichman
Senior Archaeologist
